

dear people of the fcc, before satellite radio my radio was allways off, xm radio has been the best investment i've ever made. the weather channels satellite radio provides has been a great benefit for my line of work and i cant imagine having to listen to hours of commercials just get a simple forcast from some corny dj on traditional radio. letting the national association of broadcasters dictate what im paying to hear would be like going to a baesball game then be told i have to leave before the last inning because the NAB wants me to hear the score on their stations. i dont tell my competitors what they can sell, so what right does the the NAB have to control what their competition can provide to its subscribers. i dont tell you what you can listen or watch so dont mess with my xm radio!!!
